

Full Lifecycle Water Management Solution

Welcome to Barreleye Software, your partner in innovative water management solutions. Our advanced applications, Barreleye Planning and Barreleye Tracking, offer tailored solutions to optimize your water strategy and streamline operational efficiency. Whether you need comprehensive planning tools or precise tracking capabilities, our cutting-edge software ensures your water management processes are efficient, compliant, and cost-effective. Discover the power of specialized modules designed to meet the unique needs of the energy industry.

Comprehensive Solutions for Every Need

1 Optimize Your Water Strategy with Barreleye Planning

- Optimize asset management
- Forecast and balance water usage
- Reduce and manage costs
- Plan for the future

2 Achieve Full Visibility with Barreleye Tracking

- Accurate data collection
- Ensure compliance
- Streamline reporting
- Monitor in real-time

Barreleye Planning, Tracking or Both?

At Barreleye, we understand that every operation has unique challenges

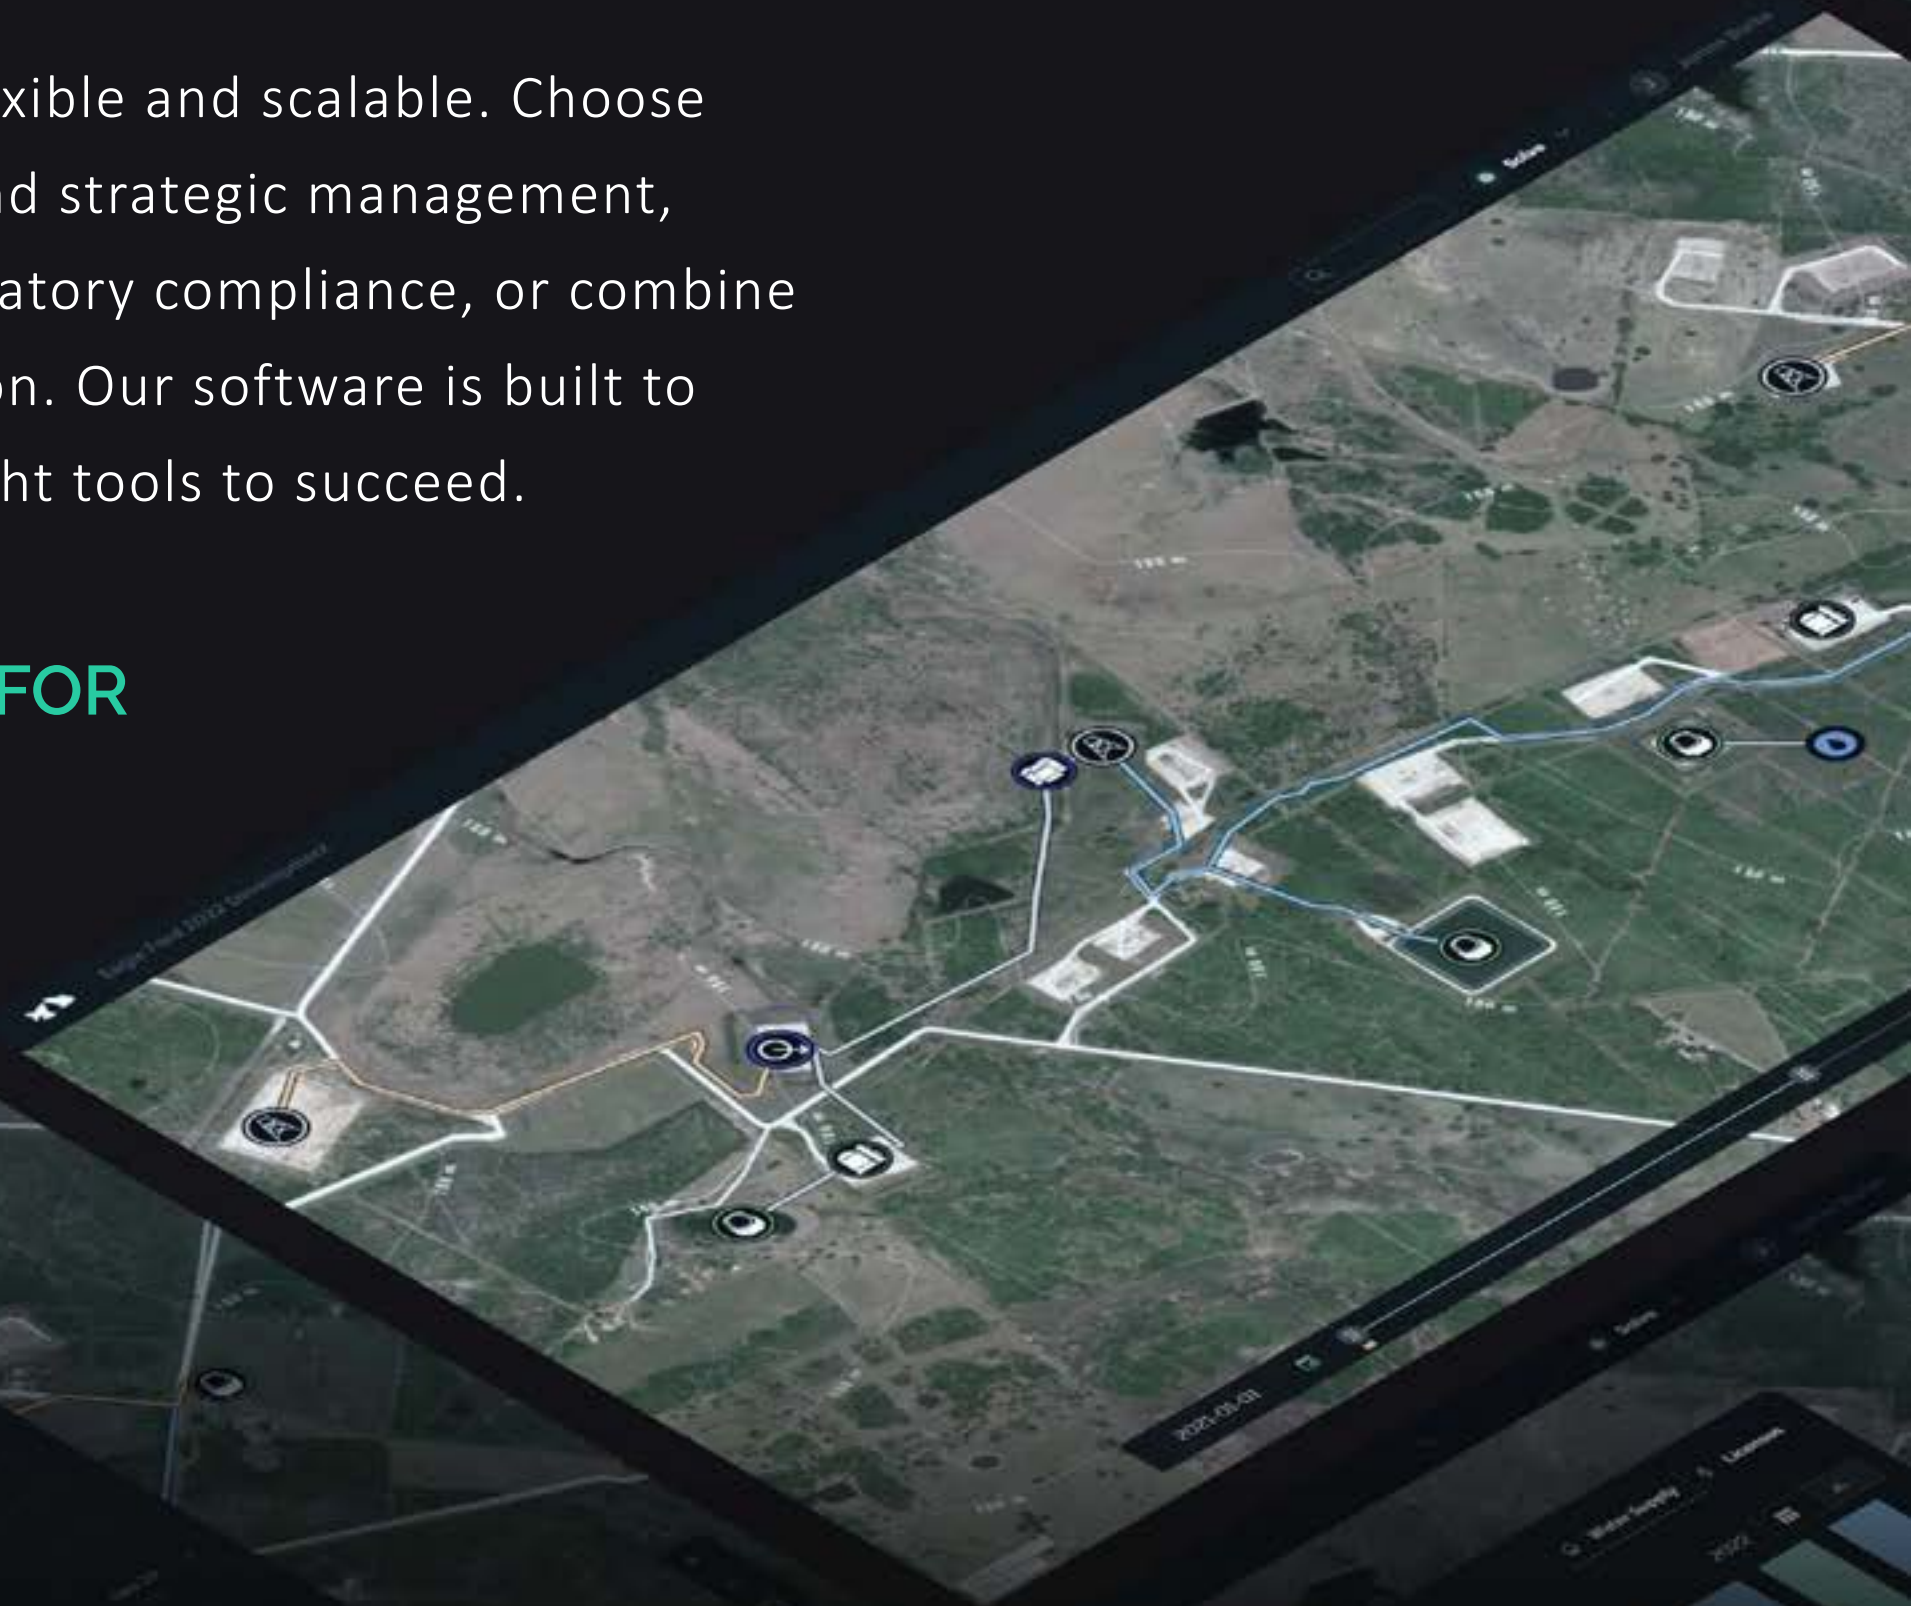

That's why our solutions are designed to be flexible and scalable. Choose Barreleye Planning for advanced forecasting and strategic management, Barreleye Tracking for real-time data and regulatory compliance, or combine both for a full-cycle water management solution. Our software is built to adapt to your needs, ensuring you have the right tools to succeed.

CHOOSE ONE OR COMBINE BOTH FOR FULL-CYCLE WATER MANAGEMENT

TRACKING

Precision in Water Management

Planning & Tracking Solutions

BARRELEYE PLANNING

Barreleye Planning provides a comprehensive suite of tools designed to enhance water management in the energy sector. With features like Map-Based Asset Modeling, Material Balance Analysis, Water Forecasting, Cost Management, Scenario Management, and AI-inspired Water Optimization, our planning application ensures precise and proactive water management. Transform your operations by reducing costs, increasing efficiency, and anticipating future needs with Barreleye Planning.

BARRELEYE TRACKING

Barreleye Tracking offers unparalleled capabilities for accurate and efficient water monitoring. With Actuals Management, In-Field Data Capture, and Innovative Reporting, our tracking application ensures precise data collection, real-time monitoring, and comprehensive reporting. Maintain regulatory compliance, streamline operations, and ensure transparency with Barreleye Tracking. Leverage our user-friendly mobile app to capture data on the go and integrate seamlessly into your workflow.

WHY CHOOSE BARRELEYE?

With decades of combined experience in the energy and software industries, Barreleye is uniquely positioned to deliver solutions that are both innovative and practical. Our team of experts is dedicated to providing continuous support and enhancements, ensuring your water management processes remain at the forefront of industry standards. Trust Barreleye to help you achieve operational excellence and sustainability.
